

CIRCULAR

Reference Number: 220-TD/CIR/2026/05

Date: 28 September 2026

To: Persons registered for Green Tax

Subject: **Launch of the Maldives Guest Information System (MGIS)**

MIRA is pleased to announce the launch of the Maldives Guest Information System (MGIS) today (1 October 2026).

MGIS is the centralized digital platform developed by MIRA to facilitate the collection and reporting of guest-related information required for Green Tax administration. The system is designed to support tourist establishments in maintaining guest records and streamlining their reporting obligations. MGIS has been developed to integrate with taxpayers' existing Guest Management Systems through a secure Application Programming Interface (API), enabling the automatic transmission of guest data. This will effectively replace the current manual approach of uploading a guest information sheet through MIRAconnect when filing green tax returns, with a more seamless and efficient Green Tax return filing process.

From today onwards, taxpayers may begin using MGIS to manage and submit guest information.

While the use of MGIS is not mandatory for all Green Tax registered persons at this point in time, MIRA intends to gradually implement mandatory use of the system in the near future. Sufficient notice will be provided before any mandatory requirements take effect.

MGIS can also be used as a standalone guest management solution. Tourist establishments that do not currently have their own Guest Management System may use MGIS to record, manage and maintain guest information directly within the platform.

Persons registered for Green Tax are therefore encouraged to familiarize themselves with the system and begin using it as early as possible.

Please refer to MIRA's [web portal user guide on MGIS](#) for detailed information on the system, its workflow, and instructions on how to use the system.

For further assistance, please contact MIRA at 1415 or email MIRA at 1415@mira.gov.mv.
